#### ADVISORY ACTION

Claims 19-39 and 90-140 are pending and are under consideration.

### Response to Arguments

The amendment filed on November 2, 2005 under 37 CFR 1.116 in reply to the final rejection has been considered but is not deemed to place the application in condition for allowance and will not be entered because: the proposed amendment raises new issues that would require further consideration and/or search. The amendment has not been entered for the following reasons:

The amendment adds new claims, claims 130-131 drawn to an isolated host cell comprising the nucleic acid of claims 128 or 129, which was never presented in any previously filed amendments. If the amendment is entered, claims 130-131 would have to be withdrawn since the claims are independent or distinct from the invention originally claimed for the following reasons. Host cells and polypeptides are structurally distinct molecules: host cells are living microorganisms and polypeptides are chemical compounds. Alternatively, if the amendment is entered, claims 130-131 would be rejected under 35 U.S.C. 101 for reading on host cell as they exist naturally because the claims do not particularly point out any non-naturally occurring differences between the claimed products and the naturally occurring products, such as being "transformed". Therefore, the newly amended claims warrant further consideration on the particular of these newly added claims.

Application/Control Number: 09/722,602

Art Unit: 1652

In view of the non-entry of the above amendment filed on November 2, 2005, all previous rejections are maintained for reasons of record.

## Allowable Subject Matter
